Work Experience

Frontend Developer
September 2023 – Present

Anibal Bilişim

- Developed responsive web interfaces using Next.js
- Collaborated with cross-functional teams
- Applied performance optimization for faster page loads and better user experience
- Conducted testing and debugging to ensure overall stability of web applications
- Maintained clear documentation for codebase
- Actively sought and applied feedback
- Managed time effectively to meet project deadlines and prioritize tasks

Projects

NexStep Productivity Dashboard

Enhanced React Productivity Dashboard: Habit Tracker, To-Do List Pomodoro Timer.

- **Dashboard**: Personalized greetings, quick overview of daily objectives, habit tracking, and detailed analysis.
- **To-Do List**:Task CRUD operations, clear task management, real-time handling, prioritization, and completion tracking.
- **Pomodoro Timer**: Customizable timer with adjustable durations and visual cues for productivity.

Flight Search Application

A React-based flight search app. Used Vite, Tailwind CSS, Material-UI, and Framer Motion.

- **Date Selector**: Built an intuitive, calendar-based interface. Simplified date picking for users.
- **Search Inputs**: Enhanced search experience by creating dynamic departure and arrival fields.
- **Flight Details**: Optimized flight info presentation to facilitate user choices.
- **Responsive Design**: Achieved cross-device compatibility and universal accessibility.
- **Sophisticated Animations**: Enhanced visuals and engagement by integrating Framer Motion.
